OUR DESIGNERS

This is our design team.

A diverse collection of upcoming talents and established designers from a wide range of countries. From Canada to Japan. Each with a distinctive and unique style but all with a coherent modern interpretation of the Scandinavian design heritage. Eager to discover and develop new ideas whether it being in form, function or choice of material.

Our designers are handpicked to ensure that they share and strengthen our vision of creating timeless design with great attention to detail and quality.

MADE FOR YOU MADE FOR USE

Our products are made for everyday living spaces. Our collection is thoughtfully designed with high quality materials to meet the demands of a modern home.

To enjoy WOOD products for years to come, it is important to take care of them in the best possible way. Wood is one of our favourite materials but because it is a living material, it requires maintenance throughout its life span. We strive to create long-lasting original design with great attention to the material and its details. When we hand over our products, we hope you will give the design the attention it needs because great quality requires great care.

Take good care.

MONO CHAIR

SHAPE
MATERIAL
IDEA

KASPER NYMAN

The Finnish designer Kasper Nyman strives to challenge himself and the materials used in order to create products that comprehend modern Scandinavian design and visual simplicity.

The inspiration and idea behind the Mono chair came from a new innovative oak veneer. *"I wanted to design a concept, which made use of the new material's features. The wooden grain reacts to the overlapping construction of the seat and it lures you in to have a closer look at the detail"* says Kasper Nyman. Mono is an interpretation of the new possibilities the oak veneer provides as the overlapping construction of the seat would simply not be possible with conventional laminating techniques.

MIRROR BOX

SCULPTURAL FUNCTIONALITY

LAURA BILDE

Laura Bilde is one of the most talented upcoming designers in Denmark at the moment. Her designs are characterised by the Scandinavian simplicity where aesthetics and functions are crossed in a sculptural universe. She manages to experiment with materials and simple details that bring joy into the use of her design.

Mirror Box is a great example of the characteristics of Laura Bilde's work because it is more than just a mirror. The steel frame construction fits four perforated storage boxes, a black marble plate and a circular mirror. With the graphic expression and minimalist design, Mirror Box works as a beautiful and functional decoration on the wall. Personalise it to suit your needs. Make it yours.

ANNULAR PENDANT

REUSE THE SHAPE
RETHINK THE LIGHT

M-S-D-S STUDIO

M-S-D-S Studio is a Toronto based multi-disciplinary design practice that works in interior, furniture, and product design. The studio is dedicated to material exploration and resourcefulness. M-S-D-S produces design that engages contemporary culture while adhering to the abiding principles of good design and the inheritance of craftsmanship.

The Annular pendant is a great example of M-S-D-S's design intelligence as the pendant pairs one primary form, a conical shade, with another, a perfect ring of light at the fixture's perimeter. Simple and quite brilliant. The light is designed to be evocative of classic pendant light fixtures and resolutely contemporary. M-S-D-S elegantly rethinks the light while reusing the shape of a classic cone pendant.

TÖJBOX

JUST PURE WOOD

MADE BY MICHAEL

Made by Michael is a design studio founded by Michael Daae Christensen with the aim of carrying on the Scandinavian design traditions of quality and long-lasting products. The characteristics of the studio are functionality and simplicity with a special awareness on sustainability. Made by Michael's preferred material is wood – as part of his approach to sustainability, Michael experiments with different joint methods while having a constant focus on production, manufacturing and packaging. The goal of the design by Made by Michael is to leave the viewer with a little 'Aha' moment of childish wonder and joy. Tøjbox is no exception. At first sight, the design provokes with its simple and light construction – but nothing about Tøjbox is random. It is the small details that give Tøjbox its character.

STEDGE SHELF

UNBALANCED BALANCE

LEONARD ALDENHOFF

The talented German designer, Leonard Aldenhoff, combines industrial mechanic know-how with creativity and aesthetics. Inspired by technical and geometrical precision, his work is characterised by clear forms and meticulousness.

Stedge was created within the scope of a university project. The shelf should demonstrate lightness, purism and a clear structure. The subtle design functions as an optical illusion as the solid shelves seem to hang by a thread. The unbalanced appearance of the Stedge shelf makes it a minimalistic stage. The minimum usage of needed parts is used to establish a stable and modern shelf. The form of the shelf creates a delicate look because most of the time you only see the wide framed edge. Simple, elegant and carefully thought through.

HONESTY

No need to make something more than it actually is. No need to come up with something that is not true. No need to hide something that needs to be seen. In our products, in our work and in our approach, honesty is paramount to us.

We believe that what you see is what you get. Our products' honesty is reflected in the material chosen. It should not look like something else. If looks and feels like wood, it is because it is. Turn it around. Look inside. It is honest and high quality all the way through.

RAINING CIRCLE RUG DESIGNED BY RIKKE MALLING
VIRKA SIDEBOARD DESIGNED BY RØPKE DESIGN AND MOAKK

MIRROR BARB DESIGNED BY MARTIN ZANOLIN

SIMPLICITY

Why make it more complicated when the simplicity in the design speaks for itself. Simplicity is anchored in us through the Scandinavian design heritage. It can be in shape, expression, story, function, colour or material. Often it is the combination.

For us, simple designs are more aesthetically pleasing. Simplicity is more accessible. We know simple when we see it, when we touch it, when we use it. We hope you do too.

LÆKKERHED

[ˈlæɡərheð]

The Danish word 'lækkerhed' cannot be translated directly into English. It is that feel, that smell, that sound, that surface, that packaging, that softness, that roughness, that styling and that material. All of these should ooze of 'lækkerhed'. It is in our work and our way of doing things.

Look for the small refinements.

Time and effort have been put into every little detail for you to get that feeling of 'lækkerhed'. We hope you will find the small details. They are made for you and made for use.

WE WANT TO SHARE OUR LOVE FOR HONEST DESIGN WITH YOU

WOUD was founded with our love for honest design and we want to share that love with you. WOUD is the dream of founding a strong, ambitious design brand in collaboration with talented designers who have that Scandinavian feel and expression with an international touch in their designs. The idea was to create an entire WOUD universe - and here we are today. Looking at our collection, we are so proud that we have come this far. However, the good thing about great design is that it never ends. We always continue our search for new items, new ideas and new stories to tell. We find our drive in the exploration of innovative design whether it is in form, function or material. We hope you enjoyed the collection and you found items that were love at first sight for you. If there is anything we can do to assist you, we WOUD always love to say hello.

Warm regards,

Mia and Torben Koed

SAY
HELLO!**

WOUD COLLECTION 2017

Since our start in 2014, we have aimed at creating timeless design that can express personalities, evoke feelings, inspire people and create beautiful homes. We still hold on to that in our new collection. We have extended our first collection with an even broader and deeper selection of honest design. New talents have joined our design team from a wide range of countries such as Denmark, Germany, England and Japan. In our new additions, you will find interiors such as mirrors, trays, shelves and flowerpots. Each design has the simplistic Nordic feel with an international touch. We have handpicked the designs to make sure that each product has a meaning, a purpose and a function. We look forward to showing you what some of the most talented designers have come up with. We hope our collection will radiate 'love at first sight' for you. It surely does for us.
