MODULAR[®]
LIGHTING INSTRUMENTS

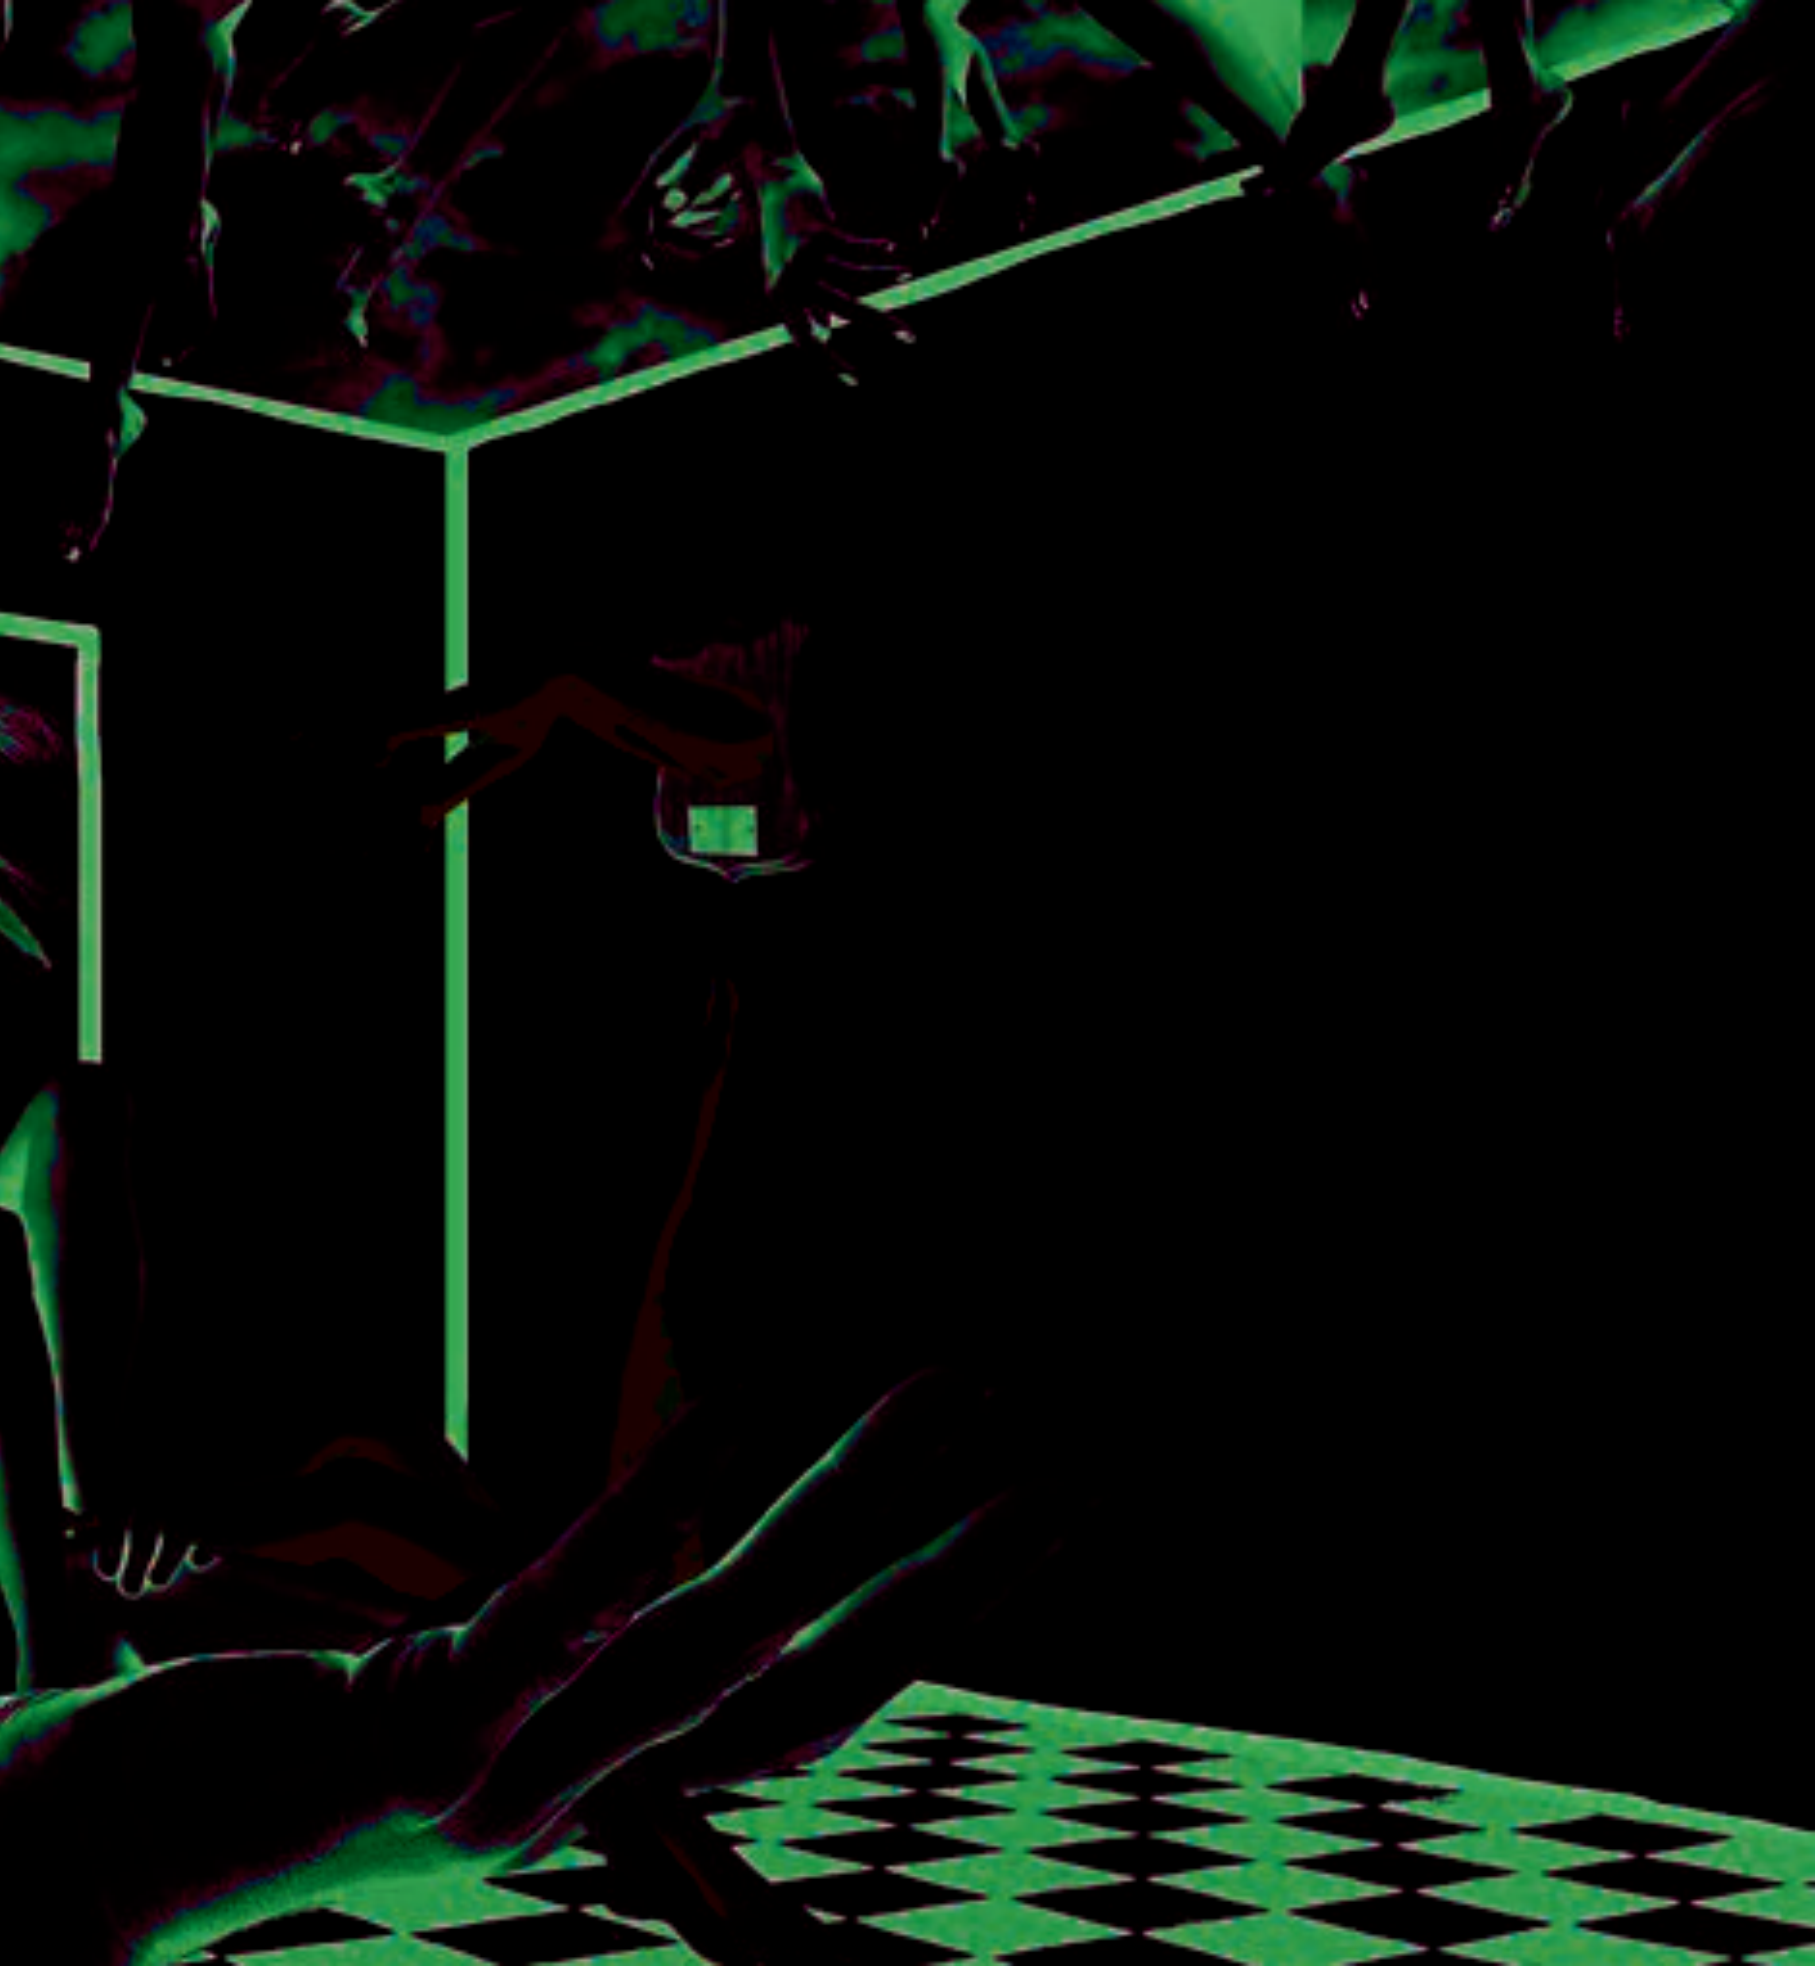

Leaving everything to your imagination.
Everything is possible in surrealism. It's giving the space to dream,
to be creative, to push boundaries, to change and to surprise.
That's what Modular has been doing for the last 30 years.
And that's what we will continue doing in the future.

**“There is a crack in everything.
That's how the light gets in”**

Leonard Cohen

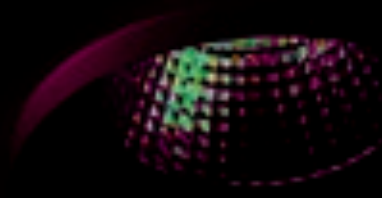

The catalogue in a nutshell...

1

SMART KUP

Subtle lighting

Smart kup is one of the 3 forms of the Smart family. The cone of the Smart kup ends in a fine trim. A trim particular Modular. The same subtle trim is used in several other Modular luminaires. The Smart family's styling is based on our most popular designs. Concretely this means that the luminaires consist of a light source (LED or halogen) which can be combined with one of three trims to suit your needs. The new spotlights can be combined with Smart mask, Smart surface box or surface tubed to form the perfect solution for any interior. Choose a white, black or gold finishing. Also available in different sizes, fix and adjustable, IP version, ...

New catalogue setup

Luminaire families are listed alphabetically. Preferred application is indicated on the introduction page of each family. Preferred applications are:

CEILING

WALL

FLOOR

The luminaire family always start with the LED versions, if available.

Mounting possibilities are indicated with following icons:

RECESSED

SURFACE

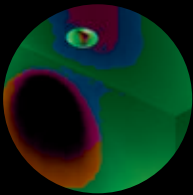

SUSPENDED

2

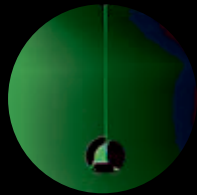

Accessories

Accessories (if available) are indicated next to the product matrixes.

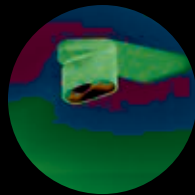

Accessories include housings, back plates, surface boxes & masks, suspension kits, color filters, ...
Housings are always 'gear included'.

ASY LOTIS

Wall wash light

Lotis is known for its effortless design and high functionality. Asy lotis has all the features of a normal Lotis family member but has one additional benefit: asymmetry. The light shines down at an angle of 28°, which creates an attractive wash effect on the wall. Available in different sizes, colors and variants (directional or non-directional). Asy lotis completes the full range of the Lotis family and blends perfectly with the other members of the family in the same space.

BOLSTER

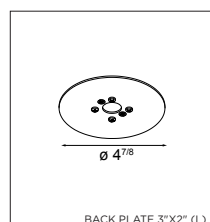

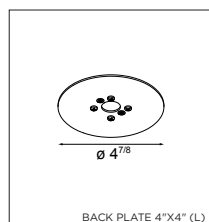

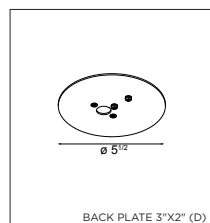

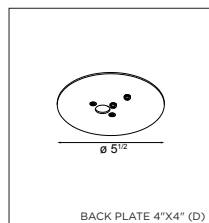

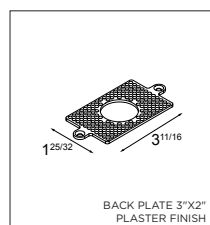

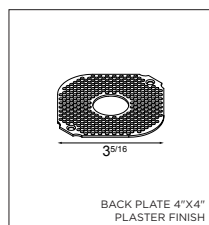

Powerful retro feel

Think roller skates and disco. Bolster always brings a touch of the sixties to a room. Choose the fully chromed versions with mirror effect or tone things down with the matte black or white versions, which also have a chromed edge. Available as a foot, recessed, track and pendant variant. As it is highly adjustable (offering 359° rotation and 90° inclination), Bolster will create a festive atmosphere in the entire room.

DUELL

Exciting color play

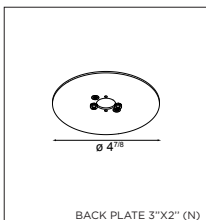

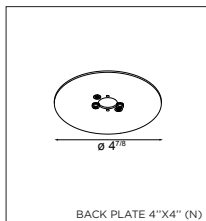

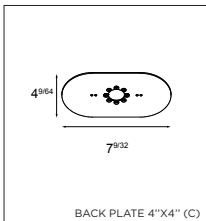

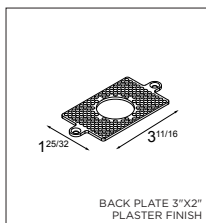

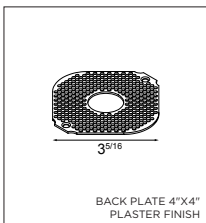

Duell has Modular written all over it. With its gentle curves, Duell gives every room a softer touch. The duo toned fixtures allow you to play with color. Duell surface is available in a directional variant and LED version which is perfect for accent lighting in the space. New colors extend the Duell wall range. Metallic blue - silky grey - cacao bronze are bringing an even more authentic feel into the room.

IZAR

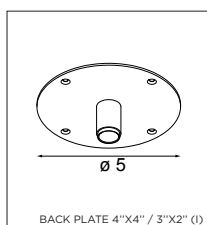

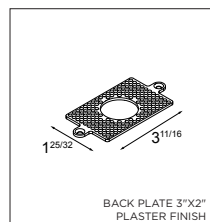

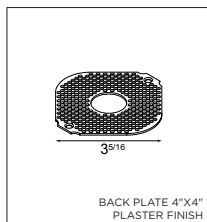

Futuristic light puzzle

Izar is based on a futuristic puzzle system whose basic shape - a three-legged, rounded star - can be used either alone or in combination with other Izars. However you use it, it's impossible not to use Izar creatively in a space. For wall or ceiling mounting or use with the suspension set. Available in white and black, with matt or glossy finishing.

LOTIS

Modular's holy lighting grail

Lotis is the recessed spotlight which started it all. The hallmark of this luminaire is the deeply recessed cone which holds the light source and has a fine edge. Choose white, black, aluminium or gold for a different lighting experience or to match with the interior decoration. Lotis comes in different diameters.

LOTIS TUBED

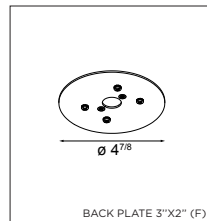

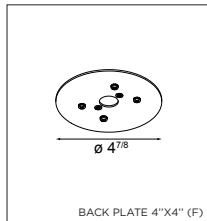

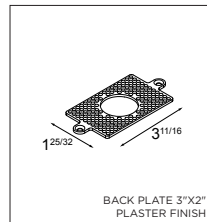

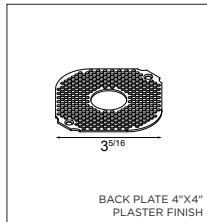

Versatile spotlight

Lotis tubed is the surface mounted version of the standard Lotis recessed spot. The colored cylinder accommodates the Lotis spot. Lotis tubed is available in different heights. The largest size also comes in a suspended version. Combining both versions creates depth in your rooms and spices your interior. Lotis tubed allows you to play with color: go for a contrast between black, white and gold or choose a more uniform look instead.

MINI RITM

Highly versatile

Twenty years after its initial launch, Mini ritm is still a coveted luminaire. Mini ritm is the reference of our architectural lighting portfolio. The technology is on full display and allows this luminaire to fit well into both a minimalist and an industrial-chic environment. The gimbaled system allows you to direct the light source at any angle of your choice. Mini ritm has a very subtle alu trim. Available in one-, two- and three lamps versions in different colors. Connect Mini ritm with Smart by adding the Smart frontrings to your recessed spot.

MINI RITM TRIMLESS

Highly versatile

After twenty years still one of the architect's favorites. Mini ritm trimless, with its minimalistic features becomes part of the interior. Its dark or white casing vanishes when switching on the light. The versatile Ritm leaves nothing to the imagination with the technology on full display, allowing this luminaire to fit well into both a minimalist and an industrial-chic environment. The gimbaled system allows you to direct the light source at any angle of your choice. Connect Mini ritm trimless with Smart by adding the Smart frontrings to your recessed spot.

SMART CAKE

Soft light

Smart cake is part of the Smart family. This family's styling is based on our most popular iconic designs. Its gently sloping sides ensure a soft distribution of light. Since its introduction in 2010, Smart has become an extensive portfolio with a broad range of accessories. Concretely this means that the luminaires consist of a LED light source which can be combined with one of three trims to suit your needs. The new spotlights can be combined with Smart mask or Smart surface box to form the perfect solution for any interior.

SMART KUP

Subtle lighting

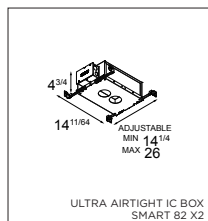

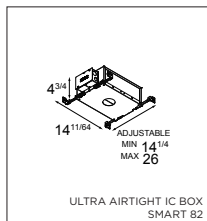

Smart kup is one of the 3 forms of the Smart family. The cone of the Smart kup ends in a fine trim. A trim particularly Modular. The same subtle trim is used in several other Modular luminaires. The Smart family's styling is based on our most popular designs. Concretely this means that the luminaires consist of a LED light source which can be combined with one of three trims to suit your needs. The new spotlights can be combined with Smart mask or Smart surface box to form the perfect solution for any interior.

SMART LOTIS

Timeless light

Smart lotis is the best known fixture within the Smart family. The deeply recessed cone which holds the light source inspired the designers to create a very versatile spot to be combined with multiple accessories. This family's styling is based on our most popular designs. Concretely this means that the luminaires consist of a LED module which can be combined with one of three trims to suit your needs. The new spotlights can be combined with Smart mask or Smart surface box to form the perfect solution for any interior.

SPLIT

Inquisitive lighting

Split is the result of improved folding techniques. It is a wall-mounted up- and downlighter which consists of a single folded plate with a fine slit from which the light radiates. Split's asymmetrical design makes it ideal for areas that would benefit from atmospheric lighting, such as living rooms, bedrooms or hallways. Available with a white or black structure and a white, black or gold interior which ensures a warm glow of light.

SPOCK

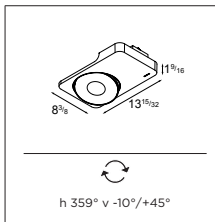

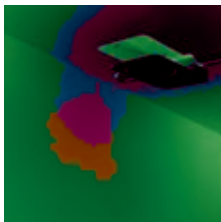

Extraterrestrial lighting officer

Spock is part of an extraterrestrial population at Modular, united by their powerful, ultra-thin LED lighting disc. Spock conceals all its ingenious workings in one slender housing. Here, the design reinforces its functionality. A unique tilting system makes the lighting disc highly directional. Be creative with Spock by placing it in a straight line or by putting it in a more playful setting. Spock is available in different beam angles and different color temperatures. Spock's track version is well suited for using in a retail environment.

SQUARE MOON

Timeless moonlight

Square moon is very popular with fans of architecture. The 'square moon' was one of our first tributes to fluorescent lighting. The fixture, which is available in rectangular or square versions and various sizes, can either be suspended or surface mounted on the ceiling or wall. Choose Square moon backlit for an atmospheric, indirect effect. Creative types can use Square moon as a stylish light box by customising the plexiglass.

STOVE

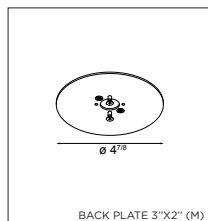

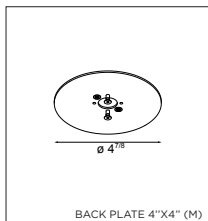

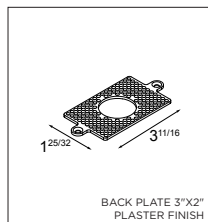

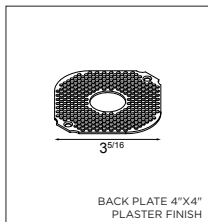

Heart-warming geometry

A fixture which is both sleek and playful. Its name wasn't chosen at random: from below, you can clearly see the outline of a stove, with the asymmetric foot as the flue. Stove is the result of pure geometry and has been perfected down to the smallest detail. Although the lamp has robust, clearly defined lines that do not merge into each other, it still retains a perfect balance. The unusual thing about Stove is the two pivot points which make this spotlight a particularly versatile and highly directional light source.

TRAPZ

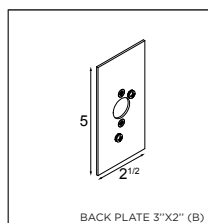

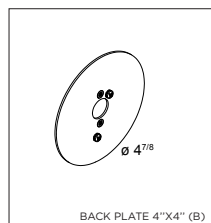

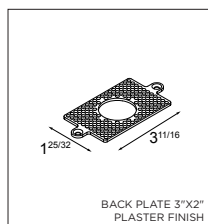

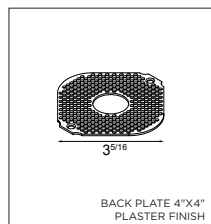

Geometry with an edge

With their indirect lighting and subtle shadow effects, wall fixtures are undoubtedly atmosphere creators. Trapz, our organic interpretation inspired by a trapezium, is no different. The flattened cylinder has been finished with two oblique openings, which allow you to see the contrasting interior of the luminaire and immediately create an unusual chiaroscuro effect. New color combinations extend the Trapz LED range. Metallic blue - alu, silky grey - champagne, cacao bronze - black are bringing an even more authentic feel into the room.

VAEDER

Glare-free working light

With a name derived from the verb 'evade', it is clear from the start that Vaeder will run a mile from the merely average. This new fixture feels equally at home in an energy-efficient, ergonomic office environment as in a home office. Its characteristic honeycomb structure in combination with a wafer-thin diffuser reduces glare to a minimum, whilst Vaeder's ground breaking LED lighting results in an energy-efficient and high performing office fixture, responding to the European standard EN 12464-1.
